Space Telescopes & Payloads

Message from the Guest Editors

Dear Colleagues,

Building on the extraordinary success of the James Webb Space Telescope and the remarkable technological advancements that have made it possible to deploy a 6.5-meter telescope in space, this Special Issue aims to showcase the latest developments in Space Telescopes and Payloads. With the ongoing exploration of Mars by rovers and the first-ever flight of a helicopter off Earth, as well as the Solar Orbiter’s unprecedented imagery of the Sun and Parker Solar Probe touching the solar corona, this is an exciting time in the advancement of space-based instruments central to such groundbreaking missions.

Original research contributions are welcome in the following areas:
**Editor-in-Chief**

Prof. Dr. Konstantinos Kontis  
School of Engineering, University of Glasgow, James Watt Building South, University Avenue, Glasgow G12 8QQ, Scotland, UK

**Message from the Editor-in-Chief**

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

*Aerospace* adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

**Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.  
**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.  
**Journal Rank:** JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
