Space Tether Missions

Guest Editor:

Prof. Dr. Vladimir S. Aslanov
Head of Theoretical Mechanics
Department Samara National
Research University, Samara,
Russia

Deadline for manuscript
submissions:

closed (31 July 2019)

Message from the Guest Editor

Space tethers are an evolving, important, and enabling space technology with multiple applications in near Earth orbit, in interplanetary space, and around other planets. Space tether systems have long ceased to be just theory. The first experiments with using them were conducted in the mid 1960s, and currently more than ten programs have been realised.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Konstantinos Kontis

School of Engineering, University of Glasgow, James Watt Building South, University Avenue, Glasgow G12 8QQ, UK

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank: JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
