Deadline for manuscript  
submissions:

**1 December 2020**

### Message from the Guest Editor

The recent advances in Information and Communication Technologies (ICT) have been phenomenal. Various disruptive innovations have brought us to the digitalization era that is characterized by the keywords “smart” and “connected”. While all previous efforts were intended to automate individual systems, today’s focus is on the integration of all systems within a value chain into digital ecosystems.

Aeronautical informatics is the key applied field of research that focuses on understanding, applying, and enhancing advancement of ICT in aeronautics. This multidisciplinary field is involved in information processing and engineering of information systems in relation to the science or practice of building or flying aircraft.

This SI aims to highlight recent aeronautical informatics research and encourages authors to submit articles and reviews that address (but are not limited to) advances in Software Engineering, Cyber-Physical Systems, Internet of Things (IoT), Service-Oriented Architecture (SOA), Digital Twin, Big Data and Data Analytics, Artificial Intelligence, Reconfigurable Computing, and Wireless/Cellular Networking applied to aeronautics.

South, University Avenue,  
Glasgow G12 8QQ, Scotland, UK

## Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

*Aerospace* adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

## Author Benefits

**Open Access:**—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** Covered in the [Emerging Sources Citation Index \(ESCI - Web of Science\)](#) from Vol. 3 (2016), in [Inspec \(IET\)](#) from Vol. 4 (2017) and in [Scopus](#) (CiteScore: **2.6**, ranked 45/127 in "Aerospace Engineering").

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2020).
