Message from the Guest Editor

Space debris related problems have come to the forefront of aerospace research in the past decade, in light of several developments. It is widely accepted at this time that the amount of space debris will continue to grow over the coming decades and some remediation measures need to be undertaken. In this Special Issue, we invite high-quality original contributions dealing with all aspects of the impact of space debris on the space environment, as well as methods for dealing with the space debris problem. Papers disclosing new developments, analysis and/or experimental results in the context of space debris impact and remediation are invited, including topics related to space debris environment, collision risks/hazard analysis, value analysis associated with debris removal, methodologies for disposing of debris and active debris removal strategies. The focus of the issue will be on low-Earth orbits, with the view to advancing both the current knowledge on the impact of debris and the technological readiness of solutions for dealing with this problem.

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: Covered in the [Emerging Sources Citation Index \(ESCI - Web of Science\)](#) from Vol. 3 (2016), in [InsPEC \(IET\)](#) from Vol. 4 (2017) and in [Scopus](#) (CiteScore: **2.6**, ranked 45/127 in "Aerospace Engineering").

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2020).
