Special Issue

Situational Awareness Using Space-Based Sensor Networks

Message from the Guest Editors

The rapid advancement of space-based sensor networking has significantly enhanced our ability to monitor and understand ground, maritime, air and space targets. Situational awareness, the ability to perceive, comprehend, and predict events in complex operational domains, is now increasingly reliant on the capabilities provided by satellites and other spaceborne platforms. This Special Issue, "Situational Awareness Using Space-Based Sensor Networks", seeks to explore the latest developments and innovations in this critical field.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.
Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
