

Special Issue

Finite Element Analysis of Aerospace Structures

Message from the Guest Editors

This Special Issue aims to provide a platform for scholars and engineers to present the latest advances in finite element modeling, numerical techniques, and engineering applications related to aerospace structures. Contributions covering novel simulation methodologies, experimental validation of FEA models, and case studies in structural integrity, reliability, and life prediction are particularly welcome. By bringing together diverse perspectives from academia and industry, this Special Issue seeks to promote knowledge exchange and foster innovative solutions to advance the future of aerospace structural analysis and design.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2
(Aerospace Engineering)
