

Special Issue

Guidance and Control Systems of Aerospace Vehicles

Message from the Guest Editors

To promote the development of space transportation technology, highlight the latest research findings, and provide a comprehensive overview of cutting-edge trends in guidance and control system design and its applications. This Special Issue aims to collect the latest advancements in guidance and control system design for aerospace vehicles, as well as share the latest research achievements related to intelligent and progressive guidance and control theories and experimental studies associated with aerospace vehicles. It primarily invites articles from the technical field, including but not limited to novel dynamic modeling analysis, trajectory planning, guidance and control method design, and experimental validation.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2
(Aerospace Engineering)
