

# Special Issue

## Advanced Aircraft Structural Design and Applications

### Message from the Guest Editors

As the demand for advanced aircraft continues to grow, so does the complexity of structural design and applications. To meet requirements for performance, weight, and safety, aircraft structural design is progressing toward lighter weight, higher strength, and enhanced reliability. This Special Issue of *Aerospace*, titled “Advanced Aircraft Structural Design and Applications”, will focus on the latest research advancements and technological innovations in this field.

## About the Journal

### Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

*Aerospace* adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
