Special Issue

Aerospace Mechatronics

Message from the Guest Editor

Aerospace systems are genuine mechatronic artifacts characterized by the synergistic integration of their mechanical, electromechanical, and electronic components, as well as built-in informational constituents in the form of onboard computers, microprocessors and microcontrollers. Design of such systems is challenging, as the conventional decoupled or loosely-coupled approaches can hardly provide optimal or even sub-optimal solutions.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.
Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
