

Special Issue

Space Robotics and Embodied Intelligence: Advancing Autonomous Exploration

Message from the Guest Editors

The development of space robotics technology is rapidly advancing, with a wide range of applications involving manned spaceflight, on-orbit services, large space structure assembly in orbit, planetary scientific exploration, and space resource development. The structure of space robots has evolved from traditional rigid structures to flexible or soft body structures, showing a trend toward the integration of rigid and soft characteristics.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2
(Aerospace Engineering)
