

## Special Issue

# Guidance, Navigation and Control Algorithms for Satellite Formation Flying

### Message from the Guest Editors

This Special Issue aims to collect contributions in a range of aspects related to GNC systems, spanning from relative navigation and the establishment and maintenance of the required relative configuration between the elements of a space distributed system, to collision avoidance monitoring and manoeuvring. Particular attention is devoted to algorithms' development and verification. Potential applications include, but are not limited to, the following:

- Formation flying missions for Earth observation;
- Formation flying missions for space observation;
- In-orbit servicing missions;
- In-orbit inspection and active debris removal missions;
- Swarms missions;
- Formation flying missions around small bodies.

---

## About the Journal

### Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

*Aerospace* adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

---

### Editor-in-Chief

Prof. Dr. Konstantinos Kontis  
School of Engineering, University of Glasgow, James Watt Building  
South, University Avenue, Glasgow G12 8QQ, Scotland, UK

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2  
(Aerospace Engineering)
