Space System Engineering

Message from the Guest Editors

The birth of space systems and systems engineering as an engineering discipline happened essentially simultaneously. More than half a century after their beginnings, both space systems and systems engineering have evolved significantly. Miniaturization and commercialization have led to constellations of space systems in unprecedented quantities. Computational power and the continued adoption of modelling are leading to the digitalization of systems practices and artifacts that used to rely on documents. In these evolutions, the development of space systems has continued to rely on the practice of systems engineering, and the modernization of systems engineering has been significantly driven by the needs of space systems developers.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
