Space Tether Missions

Message from the Guest Editor

Space tethers are an evolving, important, and enabling space technology with multiple applications in near Earth orbit, in interplanetary space, and around other planets. Space tether systems have long ceased to be just theory. The first experiments with using them were conducted in the mid 1960s, and currently more than ten programs have been realised.

Guest Editor

Prof. Dr. Vladimir S. Aslanov

Head of Theoretical Mechanics Department Samara National Research University, Samara, Russia

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2
(Aerospace Engineering)
