

Topical Collection

Air Transportation—Operations and Management

Message from the Collection Editors

This Topical Collection invites papers that present solutions for the areas of air traffic operations and economics. Of interest are papers that address solutions to deal with challenges of all air traffic stakeholders. In particular, the Topical Collection wants to focus on dynamic airspace management, flight centered operations, turnaround management, air transport performance (e.g., new metrics, inter-airport coordination), trajectory management, eco-efficient aircraft operations (e.g., formation flight, contrail avoidance), airport management (e.g., integrated approaches, pre-tactical planning), delay mitigation in the transport network, and holistic optimization approaches. Innovative solutions are being sought to enable versatile investigations of the air transport domain and provide multi-disciplinary approaches.

Keywords: Aviation; transportation; airport; air space; traffic management; operations **Advantages:**

- Open Access
- High Visibility: indexed in ESCI (Web of Science) from Vol. 3, Scopus and Inspec (IET) from Vol. 4.
- Rapid Publication: submission to first decision: 21 days; acceptance to publication: 6.3 days

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
