submissions:

**closed (31 July 2025)**

### Message from the Guest Editor

Integrated Pest Management (IPM) plays a pivotal role in sustainable agriculture, particularly in the cultivation of irrigated crops. This Special Issue aims to gather innovative research and advancements in the development and implementation of IPM strategies tailored specifically to irrigation-based agricultural systems. It seeks to address the growing challenges posed by pests and diseases in such environments. We invite contributions that cover various aspects of IPM, including novel pest control methods, ecological approaches, technological innovations, and interdisciplinary studies.

The topics of interest include, but are not limited to, the following:

Novel pest and disease management techniques in irrigation agriculture;

Biocontrol agents and their applications in integrated pest management;

Sustainable approaches for minimizing pesticide usage and environmental impact;

Precision agriculture and technology-driven pest management solutions;

Economic and social implications of implementing IPM in irrigation crop production;

Case studies, reviews, and experimental findings advancing IPM practices.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
