Deadline for manuscript
submissions:

closed (20 November 2020)

Message from the Guest Editor

The viticulture (and in turn the wine sector) is a relevant agricultural industry, nowadays threatened by several environmental and economic constraints. Hence, the improvement and progress of the viticulture industry might help one to face these constraints, ensuring economic viability and natural resources conservation. This Special Issue aims to be an updated knowledge platform addressing the environmental and socio-economic components of sustainability.

Researchers are warmly invited to submit research covering (but not limited to) vineyard establishment and management, grapevine ecophysiology, and economics.

Contributions are expected to report on soil fertility, training systems and canopy optimization, soil–climate–rootstock–variety interactions, precision farming, ecology, irrigation and mineral nutrition, plant protection, water relation and abiotic/biotic stress physiology, yield and grape quality, and root–soil organism interactions.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
