Message from the Guest Editors

Microbial communities in cultivated soils are the main drivers of crop success and are responsible for numerous vital ecosystem services. The use of microbial inoculum in cropping systems has long been considered a viable solution to ensure supplementary nutrients, crop protection, biomass decomposition and the stability of soil fluxes. The current Special Issue is focused on beneficial microorganisms used in cropping systems. The main interest is in single microorganism species or microbial consortia that can be used as biofertilizers, plant growth promoters, plant protection agents, organic matter decomposers, bioremediation processes and soil health promoters. In this Special Issue, articles on microorganisms used in cropping systems are welcome. Original studies, perspectives, opinions, hypotheses, reviews, models and methodologies on sustainability and efficiency obtained with the use microorganisms; changes and improvements in biogeochemical cycles; assessments of microbial communities in treated vs. untreated soils; plant-microorganism-soil interactions; and the analysis of microbial functions, suppressive and resilient capacity will be appreciated.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
