Deadline for manuscript submissions:

closed (25 July 2023)

Message from the Guest Editors

One of the main sources of quality protein in the form of meat and milk is ruminants. In fact, ruminants are exceptional in being extremely efficient in converting plant-based nutrient sources into high-quality animal fats and proteins. Constant breeding activity has led to an increase in animal production, which is affected by several factors that have a direct but also an indirect effect on the health of animals and the quality of animal products. One of the factors affecting the production health of animals is nutrition. The quality of volume feeds (silage, haylage, hays) and feed rations (diet composition) are extremely crucial; however, they can be affected by environmental conditions, and are decreasing the welfare of animals. These factors are worsening the health and production status of animals by decreasing the reproduction performance.

Therefore, the Special Issue is dedicated to manuscript in the disciplines from the different research fields focused on the production of quality feeds, composition of daily diets, health of ruminants, reproduction of ruminants, welfare and production of sustainable animal products and their quality

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
