Deadline for manuscript  
submissions:

**closed (1 April 2019)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue examines recent advances in horticultural practices for economically-important berry crops, including blueberry, blackberry, cranberry, raspberry, and strawberry. We welcome contributions of both reviews and original research on topics such as soil and site preparation, cultivar selection, planting and establishment, pruning and training systems, mulching, irrigation and water requirements, nutrition and fertilizers, combating pests and diseases, and fruit harvest and handling. New information on practices for organic and soilless systems are also encouraged. Ideally, the contributions will cover many of the major growing regions from around the world and will include research from temperate, subtropical, and tropical climates.

Dr. David R. Bryla
