Message from the Guest Editor

Dear Colleagues,

Despite the recent increase in biochar research, fundamental understanding of its positive agronomic alterations has remained elusive. This could suggest that a single mechanism is not behind its actions. This Special Issue will be dedicated to expand our understanding of mechanisms behind the impacts of biochar application to agricultural fields. Particularly, studies that explore innovative pathways and elucidate new insights into our understanding of biochar's effect on the soil system are particularly solicited. Field scale studies are preferred, but hypothesis driven laboratory and greenhouse studies will also be considered.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
