Message from the Guest Editor

Dear Colleagues,

Dynamic interactions of plant pathogens, hosts, and the environment change over time and space. The changes happen on the environment (e.g., climate, weather, chemical application), host (e.g., introduction of new resistant lines, cultural practices), or pathogens (e.g., emerging pathogens, fungicide resistance) can further change the relationship among them. Therefore, in order to effectively manage crop diseases, it is critical for researchers and growers to understand the mechanism of this dynamic relationships. The rationale of this Special Issue is to have a better understanding of the cause and/or effect of the crop disease dynamics so that we can develop environmentally and economically sound and effective plant disease management strategies.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
