submissions:

closed (31 May 2018)

Message from the Guest Editor

Dear Colleagues,

Seed-embedded technology remains the cornerstone for intensifying sustainably agriculture, bringing eco-efficiency to, and building resilience in agro-systems. Research in crop genetic enhancement includes today from plant genetic resources conservation through use to breeding informatics, and with main focus on analysing genetic diversity and variation for further utilization in developing new cultivars or breeding lines and populations. It is, therefore, sound and timely to include a Special Issue in Agriculture dealing with plant breeding theory and practice, either using crossbreeding or genetic engineering methods. We invite those working in the amelioration of crops to submit manuscripts summarizing research results for this Special Issue.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
