International Trade in Agri-Food Sector: Current State and Future Perspectives

Message from the Guest Editor

Shifts in consumption patterns have affected the emergence of global markets. The role of foreign trade in ensuring food security is also undeniable. In the 21st century, foreign trade in agri-food products has experienced an increasing number of preferential trade agreements, an extended use of non-tariff barriers to trade, and including the COVID-19 pandemic and the Russia–Ukraine war. All of these issues affect trade dynamics and structures, while new key players in international agri-food markets arise. In this context, original research papers and review articles that address the current state and further global trade developments in the agri-food sector are welcome. Key research areas may include, but are not limited to, the following:

- agri-food trade
- commodity trade structure
- geographical trade structure
- international agri-food market
- multilateral and regional trade liberalization
- tariffs in agricultural trade
- non-tariff barriers to agricultural trade
- preferential trade agreements
- trade policies
- international competitive advantages
- agri-food supply chains
- developed and developing countries in world and regional agri-food trade

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
