

Special Issue

Economic and Environmental Assessment of Optimizing Management in Orchards

Message from the Guest Editor

This Special Issue aims to include contributions addressing socio-economic and environmental aspects in the broader transition toward sustainable production, through various main topics such as:

- Technical, socio-economic, and environmental characterization of sustainable production systems.
- Adaptation of production systems to climate change, mitigation, and biodiversity conservation through plant material selection.
- Improvement in the management and use of productive resources (irrigation water, fertilizers, pesticides, biological control, etc.).
- Utilization of agricultural and forestry residues for biogas and compost production linked to agri-food industry activities.
- Valorization of livestock and agricultural waste within the agri-food production chain.
- Application of organic fertilizers as substitutes for synthetic inorganic fertilizers in orchards.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
