Sustainable Food Supply Chains as a Potential Response to Agro-Food Loss and Waste

Message from the Guest Editors

One significant challenge for food supply chains is the persistent issue of food loss and waste, occurring from the early stages of production through to the point of bringing products to market.

Accordingly, we are pleased to invite you to contribute to this Special Issue, which aims to bring together different approaches to understanding where and why agro-food loss and waste occur across the food supply chain and to propose practical insights toward sustainable mitigation strategies.

Original research articles and reviews are encouraged on topics including, but not limited to:

- Assessment approaches to quantify agro-food loss and waste from the early stage of production to the stage of bringing the product to market;
- Factors contributing to agro-food loss and waste;
- Strategies and interventions to effectively reduce agro-food loss and waste;
- Impacts of food loss and waste on society, the economy, and the environment;
- Policy shifts and challenges supporting sustainable food supply chains and the potential externalities of such approaches.

Case studies and comparative analyses from diverse geographical regions are also welcome.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
