

## Special Issue

# Plant–Soil–Microbe Interactions for Sustainable Crop Production

### Message from the Guest Editors

Climate change, rapid urbanization, and injudicious use of chemical fertilizers and pesticides have severely impacted soil health. Sustainable crop production for a rapidly growing human population is one of the biggest challenges of the 21st century. The application of microbial biofertilizers, biopesticides, and their consortia has gained considerable attention for sustaining crop yield in diverse agroecosystems.

Though there are multiple knowledge gaps pertaining to the crosstalk between plants and microbes under stress conditions especially under abiotic stress conditions, rhizosphere engineering holds the key to improving plants' response against phytopathogens as well as imparting tolerance against a varying degree of abiotic stresses. Hence, this Special Issue invites contributions offering innovative and ecofriendly solutions to overcome the aforementioned challenges at the plant–soil, soil–microbe, and plant–microbe axis. The editors encourage the submission of original research articles, review articles, method papers, and opinions.

### Guest Editors

Dr. Andrey Vladimirovich Gorovtsov

Academy of Biology and Biotechnology, Southern Federal University,  
344090 Rostov-on-Don, Russia

Dr. Chetan Keswani

Department of Biochemistry, Institute of Science, Hindu University,  
Varanasi 221005, India

### Deadline for manuscript submissions

closed (25 September 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
