

## Special Issue

# Mycotoxin Contamination in Farm Animals: Innovative Reduction Strategies

### Message from the Guest Editors

Mycotoxin contamination can occur at any stage of the feed supply chain, including crop cultivation, harvesting, storage, and the distribution of crops and compound feeds. To minimize mycotoxin contamination, preventative measures are essential. Several approaches, including chemical and biological methods as well as the use of mycotoxin-detoxifying agents, are widely implemented to control mycotoxins in farm animals under field conditions. However, there remains a continuous need for the development of novel detection and decontamination strategies for effectively managing mycotoxin risks. We invite you to contribute to this Special Issue by submitting original research, case studies, or review papers that provide insights into mycotoxicosis in farm animals and its implications for health disorders, as well as prevention strategies under field conditions. Your contributions will play a crucial role in advancing our understanding and management of mycotoxin risks.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
