## Special Issue

# Advances in Aerial Application Equipment and Technology for Agricultural Production

#### Message from the Guest Editors

Owing to the development of sensors and intelligent control technology, unmanned and manpower-saving aerial application equipment and technology are being iteratively upgraded to promote efficient and intelligent agricultural production. Nowadays, the application domain of aerial application technology is subdivided, and it is expanding to many new application scenarios (e.g., fertilization, seeding, pollination, detasseling, and feed delivery), exhibiting great potential in agricultural production.

This Special Issue focuses on in-depth research addressing novel aerial application technologies and equipment for agricultural production, including remote sensing, aircraft path planning and navigation, experimental and numerical models for the movement of agricultural materials, collaboration between UAVs and UGVs, accurate application control methods and the evaluation of the application quality. Research articles will cover a broad range of aerial applications for agricultural production, including chemical spraying, fertilization, seeding, pollination, and detasseling, etc. All types of articles, such as original research, opinions, and reviews, are welcome.

### **About the Journal**

#### Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

#### Editor-in-Chief

#### Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
