

Special Issue

Farm Entrepreneurship and Agribusiness Management

Message from the Guest Editor

Farm entrepreneurship and agribusiness management are related concepts that involve applying business skills and knowledge to the agricultural sector. Farm entrepreneurship can play a role in agricultural sustainability through the development of innovative solutions that improve the environmental and social impacts of food production and consumption. Farm entrepreneurs can also benefit from government policies and programs that support sustainable farming practices, such as the Environmental Land Management schemes in the UK or the Rural Development Programmes of the EU member states that are offering funding opportunities to farmers and are designed for boosting innovation in Europe. The scope of this Special Issue is to address the main challenges faced by farm entrepreneurs in the UK and Europe and to identify successful strategies that would lead to effective and efficient agribusiness management practices.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia
