Special Issue

Advances in Animal Welfare and Health: Linking Physiology, Reproduction and Management

Message from the Guest Editors

The welfare and health status of animals is an important aspect of rational herd management. Breeding, welfare and health problems have huge impacts on the farm economy. For this Special Issue, original and review manuscripts covering all aspects of the link between physiological and pathological processes and reproduction and management in farm animals are welcome. We welcome research and review studies or meta-analyses concerning farm animals' welfare, reproduction, behavior and health, as well as environmental factors which may impact different aspects embrace different scientific areas. We invite all experts in the fields of welfare, reproduction, disease treatment and diagnostics, animal feeding, and neonatology to submit manuscripts for peer review. If the manuscript suits the scope of the Special Issue and meets the editorial criteria, it will undergo preliminary evaluation by the .
