

Special Issue

Genetics, Breeding and Transcriptomic Analysis of Chrysanthemum

Message from the Guest Editors

As one of the four major cut flowers in the world, the chrysanthemum holds a pivotal position in both fundamental research on flowering plants and global flower production. The upcoming issue of *Agriculture* aims to explore the most significant topics related to the genetics, breeding and transcriptomic analysis of chrysanthemum, including the aspects of flower color, flower development, flowering time, flower scents, disease resistance and chrysanthemum–environment interactions. Therefore, I cordially invite you to submit your relevant research papers to the incoming Special Issue of our journal. Your valuable research findings will undoubtedly enrich our understanding and practical approaches to the global production of chrysanthemums, contributing new insights to the knowledge system in this field.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
