

Special Issue

Agroecological Transition in Sustainable Food Systems

Message from the Guest Editor

Agroecology is gaining global interest as a key innovation for sustainable food systems, restoring ecosystems, enhancing biodiversity, and building long-term resilience.

However, the agroecological transition is a complex and multidimensional process. A deeper understanding of these dynamics is essential to effectively support agroecological transformations across diverse contexts. This special issue aims to bring together contributions that explore the processes and implications of agroecological transitions, as well as the exchange of knowledge needed to guide sustainable agricultural practices. We invite papers that address:

- Empirical and theoretical studies on agroecological transition processes
- Multidisciplinary analyses of the social, economic, environmental, and political dimensions of agroecology
- Methodological approaches to assess agroecological transition
- Research on knowledge exchange, co-creation, and innovation for sustainable food systems

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
