# Special Issue

# Sustainability of Technological Innovations in Agricultural Green Transitions

## Message from the Guest Editors

The agri-food system is facing an unprecedented set of challenges in the areas of green transition, climate change, climate neutrality, and food security. However, several phenomena, including the consequences of the Covid pandemic and ongoing conflicts in different parts of the world, risk delaying or postponing the achievement of these goals. Therefore, the path towards transitioning to a more sustainable economy and society is supported by the adoption of innovations, that can make agricultural economies and production activities greener, more digital, and more resilient. This Special Issue focuses on the economic assessment, in different territorial contexts, of the solutions and impacts of enabling technologies for the sustainable development of agri-food production. Research articles will cover a wide range of topics, including the use of precision techniques and decision support tools for farmers to rationalize the use of agricultural inputs (fertilizers, pesticides, water, and energy), the search for alternative food resources, according to the principles of the circular economy, and the evaluation of mitigation measures on the socio-economic sustainability of farms.

# **About the Journal**

## Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

#### Editor-in-Chief

#### Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

#### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
