

Special Issue

Heavy Metal Pollution and Remediation in Agricultural Soils

Message from the Guest Editors

Heavy metal contamination of agricultural soils is an escalating environmental issue. The development of innovative detection and mitigation strategies, alongside the advancement of soil remediation technologies and the promotion of sustainable agricultural practices, is imperative to minimize heavy metal risks to agriculture and human health. This Special Issue invites contributions that explore the impacts, remediation, and management techniques for heavy metal contamination in agricultural settings. We encourage interdisciplinary contributions covering, but are not limited to, processes and mechanisms of heavy metal contamination of soils; advances in analyses and monitoring of heavy metals in the environment; source identification and control in agricultural soils; assessment of heavy metal contamination on soil health, crop quality, and food safety; and effective remediation technologies. In addition, discussions on policy and regulatory approaches to soil contamination management are also welcome. Submissions may include research articles, reviews, short communications, and case studies.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
