

## Special Issue

# Agricultural Meat Products: Processing, Product Quality and Food Safety

### Message from the Guest Editors

We are pleased to invite you to submit an original contribution to this Special Issue of *Agriculture*, entitled “Agricultural Meat Products: Processing, Product Quality and Food Safety”, covering different types of meat (beef, pork, chicken, and small ruminants). This Special Issue will contain various contributions, ranging from research papers to updated reviews. Meat is a highly valued and nutritious food. Meat and meat products are an important source of protein, fat, and various functional compounds. Their quality traits and nutritional value depend on animal genetics, feeding, livestock practices, and post-mortem procedures. At this time, consumer choices and concerns exert significant pressure on production, processing, and marketing systems. The Special Issue attempts to generate constructive discussion and point out innovative developments in this research area. It includes, but is not limited to, the following relevant topics:

- Meat safety and quality;
- Processing technologies;
- Emerging technology in meat preservation;
- Ingredients and additives for meat products;
- Shelf-life studies;
- Consumption studies.

---

### Guest Editors

Prof. Dr. Gabriela Maria Grigioni

Prof. Dr. Anibal Pordomingo

Prof. Dr. Ignacio Arturo Domínguez Vara

Dr. Ernesto Morales Almaráz
