## Special Issue

# Advances in High-Quality or Value-Added Processing of Fruits and Vegetables—Second Edition

## Message from the Guest Editors

Fruit and vegetables processing is plagued by two main problems: food quality decrease and processing waste pollution with no value-added utilization. Food quality decrease is generally related to processing factors, food raw material properties, storage conditions, etc. Fruit and vegetable processing pollution is due to the various food waste, such as peel, residue, seed, leaf, processing water, etc., which can be developed as nutritional or useful byproducts to meet zero-waste and green process goals. Many studies have focused on these areas, producing useful information, but many aspects remain unsolved due to the vast variety of fruits and vegetables and the different processes for each.

This Special Issue is a continuation of the previous Special Issue, It still focuses on the quality promotion of fruit and vegetables after processing and the utilization of byproducts to create a clean process. The issue welcomes a broad range of studies related to fruit and vegetable characterization, processing, storage, quality, waste analysis, byproduct utilization, etc. Original research articles and reviews are accepted.

## **About the Journal**

## Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

### Editor-in-Chief

## Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

## **Journal Rank:**

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
