

## Special Issue

# Animal Diseases Surveillance Systems: Tools and Demonstrations

### Message from the Guest Editor

Animal disease surveillance involves the systematic ongoing collection, collation, and analysis of information related to animal health and the timely dissemination of information so that action can be taken. During the last few decades, there have been several publications and books on animal disease surveillance systems which focus on the systems' concepts and, more specifically, on either economically important diseases or the academic concept of these systems. Several successful attempts at utilizing those systems in the management of diseases were demonstrated either regionally or globally. Most of those attempts and the lessons learned from them have not been shared in appropriate scientific publications. The aim of this Special Issue is to revisit the concept of animal disease surveillance systems and their values in managing those diseases in various geographical national, regional, and global zones. Both demonstrations and lesson learned are welcome in this Special Issue

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
