

Special Issue

Design, Optimization and Analysis of Agricultural Machinery

Message from the Guest Editor

With a growing population, the challenges prescribed by the EU Green Deal and Farm2Fork strategies are pushing farmers to increase the productivity and efficiency of their practices. In this context, the design, optimization and analysis of agricultural machinery are key topics that are addressed nowadays by scholars and major world producers in the sector. These topics cover the application of engineering principles to develop, improve, and evaluate machines used in agriculture. These machines include tractors, harvesters, planters, and other equipment used for planting, harvesting, and processing crops. This Special Issue focuses on the role that agricultural mechanization plays in the development of a more efficient, safe and sustainable agricultural sector. This is why it encourages high-quality, interdisciplinary research in a variety of areas, such as engineering design, safety and health, robotics and automation, agronomy as well as field data collection and analysis. Original research articles and reviews are accepted.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
