Price and Trade Dynamics in Agricultural Commodity Markets

Message from the Guest Editors

Well-functioning, integrated, and competitive agri-food commodity markets are key to promoting the efficient allocation and distribution of resources and goods. The level of prices and trade opportunities conditions the decisions of producers and consumers. High volatility in agricultural trade and prices is observed in the era of globalisation, climate change, and political turmoil, hindering rational decisions. Therefore, the dynamics of these phenomena and the economic effects of ongoing changes require continuous observations and research. Original research papers, including theoretical elaborations, methodology studies, and empirical analyses concerning the price and trade dynamics, are welcome, and may include (but are not limited to) the following:

- Vertical and horizontal price transmission;
- Price volatility and price risk;
- Price discovery in futures and spot markets;
- The dynamics of international trade;
- Drivers of prices and trade over time;
- Impact of policies and/or external shocks/events on price and trade fluctuations;
- Novel methods for and methodology studies on price and trade dynamics.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
