

## Special Issue

# Arbuscular Mycorrhiza and Its Influence on Crop Production

### Message from the Guest Editors

Arbuscular mycorrhizal fungi (AMF) have become attractive as biostimulants in agriculture due to their known input to plant nutrient uptake and stress tolerance. AMF are ubiquitous widespread soil microorganisms, which can form a symbiotic association with the majority of agricultural plants. These beneficial microbes have been proved to offer an array of advantages to host plants. AMF can improve crops' nutrient status, also enhance their quality and yield in the face of challenges to produce enough healthy food to supply the global population in the conditions of an unstable economy, climate change, and biodiversity degradation. The focus of this Special Issue is to consider different points of view linked to the use of AMF as an environmentally friendly tool in both greenhouse and field crop production. For this reason, it welcomes high-quality studies on the application of mycorrhizal fungi to enhance crop performances and production as well as on the role of these soil microorganisms in crop stress tolerance and sustainability improvement. All types of manuscripts (original research and reviews) are accepted.

### Guest Editors

Dr. Marieta Hristozkova

Faculty of Biology, Department of Plant Physiology, Sofia University "St. Kliment Ohridski", Sofia, Bulgaria

Dr. Michail Orfanoudakis

Department of Forestry and Management of the Environment and Natural Resources, Democritus University of Thrace, 68200 Orestiada, Greece

### Deadline for manuscript submissions

closed (25 February 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
