

## Special Issue

# Agricultural Safety and Health Culture

### Message from the Guest Editor

Agriculture is one of the most hazardous activities around the world. Labor is a key factor of agricultural production, along with natural resources, capital, and entrepreneurship. However, the high risk of occupational injuries and ill health is a threat to the sustainability and development of the agricultural sector. Hundreds of fatalities and thousands of disabling injuries and work-related diseases result in significant financial and social losses. Aging, lack of education, and the image of farming as a dangerous and low-profit occupation make it difficult to attract young people into agriculture, helping to fix populations in rural areas. Building a better safety culture, adopting a vision of 'zero injuries' on farms, and using the 'One Health' principle to protect the welfare of workers, animals, as well as the environment is a topic of interest for decision-makers, and for the sector itself. This SI welcomes research and development work related to the promotion and implementation of safety culture in agricultural activities, and for workers, animals, and environment welfare and protection.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
