Special Issue

Agriculture Policies: Experiences and Challenges

Message from the Guest Editor

The agricultural sector is facing a number of challenges, among which globalization, climate change, new technologies, and sustainabilty are only a few. The sector itself, but also actors in the up- and downstream sectors, policy makers, and other interest groups have responded and continue to respond to those challenges. Agriculture policy has played an important role in shaping the performance of the sector, and will continue to do so. I am pleased to invite colleagues to submit contributions that assess agricultural policies and their impacts at different levels, and what we can learn from the past for the future. Prof. Justus H.H. Wesseler
