

Special Issue

Role of Agriculture in Implementing Concept of Sustainable Food System

Message from the Guest Editors

Sustainable and more environmentally friendly approaches to agricultural production are the current trend in the food economy. This is due to the increase in ecological awareness of society in relation to the necessity of protecting environmental components through the implementation of innovative techniques and technologies while implementing the concept of the sustainable food system "from field to table". The implementation of innovative solutions in agricultural practice and in agri-food processing will contribute to the sustainable development of the food system while maintaining effective management of natural resources and rational utilization of by-products generated in the processing of agricultural products. The aim of the Special Issue is to collect original articles and reviews in the field of healthy and environmentally friendly food systems "from field to table":

- The role of sustainable agriculture in shaping the quantity and quality of crop yields and supporting biodiversity;
- Sustainable food production and consumption as a pillar of a healthy society;
- Sustainable practices in food processing and distribution;
- Food security.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
