

Special Issue

Advanced Research on Bergamot (*Citrus bergamia* Risso & Poiteau)

Message from the Guest Editors

Bergamot is used for the extraction of essential oil (from flavedo), the extraction of juice (from the pulp), the processing of the pulp, the production of antioxidants and pectin, and the feeding of animals. Other aerial parts of the plant can also be used for essential oil extraction. Digestate and biogas can be obtained from the anaerobic digestion of production waste.

Furthermore, even landscapes are shaped by the presence of bergamot cultivation. These plots, created and transformed by agricultural activities, have environmental and landscape value in addition to their economic and social values, and give environments identity and strong connotations. This Special Issue aims to stimulate the debate on a range of scientific issues various titles, linked by the common thread of bergamot and the sustainability of its supply chain. The themes therefore include the agronomic, genetic, physicochemical, sensorial, productive, botanical, entomological, microbiological, pathogenic, technological (Agriculture 4.0), political, economic and market aspects from a supply chain perspective, and in terms of the environmental, productive, social and economic sustainability of the product.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
