

## Special Issue

# Utilization of Biomass Energy in Agriculture: Technology, Challenges and Opportunities

### Message from the Guest Editor

Biomass energy is a renewable, energy-efficient and environment-friendly energy that could play an important role in the optimization of the energy consumption structure, the increase of agricultural productivity and the improvement of environmental conditions. Agricultural wastes are regarded as the most important raw materials for biomass energy production, and can be converted into solid, liquid and gaseous fuels or other energy products through direct combustion, chemical methods, thermochemical conversion, and biological conversion. From this aspect, the utilization of biomass energy mostly refers to the treatment and use of agricultural waste by those bioenergy conversion technologies, while the byproducts from bioenergy generation can be also applied in the agriculture.

This Special Issue focuses on utilization of biomass energy in agricultural wastes conversion processes, the valorization of the byproducts, the conversion technology and equipment, and its commercial mode. Industrial policy, economic analysis, and environmental impact assessment of biomass energy can be also included in this Issue. Original research articles and reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
