

Special Issue

Honey Bee Health and Nutrition

Message from the Guest Editor

Honey Bee health and nutrition are increasingly under the spotlight due to the pivotal role of bee pollination in ecosystems and agriculture. Our primary goal is to offer a comprehensive platform for disseminating cutting-edge research which addresses various aspects of honey bee health and nutrition.

The scope of this Special Issue encompasses a wide range of topics, including the impacts of environmental pollution, pathogens, and pesticides on honey bee health, as well as innovative nutritional strategies to enhance their immune systems. Additionally, we seek to explore themes relating to the quality, safety, and high-quality production of bee products.

We welcome contributions utilizing innovative methodologies and offering insights into sustainable beekeeping and agricultural management practices. Manuscripts focusing on emerging threats, breakthrough discoveries, and practical solutions to mitigate honey bee decline are particularly encouraged. Through interdisciplinary dialogue and collaboration, this Special Issue aims to catalyze the efforts towards safeguarding the health and resilience of honey bee populations worldwide.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
