

Special Issue

Feature Papers in Crop Protection, Diseases, Pests and Weeds

Message from the Guest Editors

The section of the Agriculture journal “Crop Protection, Diseases, Pests, and Weeds” has strived toward high-quality published papers. I thank all who have contributed to results thus far. The constant challenges of climate change, pesticide resistance evolution, and the need to reduce pesticide use, encourage us to continue this path. As part of integrated pest management, particular attention has been paid to studies of innovative control strategies in sustainable agriculture. This Special Issue collects advanced studies in crop protection, pest management, pathogen identification, biological control, safe pesticide development, plant–microbe interactions, and more. In this Special Issue, multi-, inter- and transdisciplinary original papers and reviews will be collected. Contributions to this Special Issue are only accepted from the editorial board and scientists invited by the editorial board.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
