

Special Issue

Perspectives of Using Compost and Microorganisms to Control Pathogens on Vegetable Crops

Message from the Guest Editors

The management of diseases caused by pathogens in vegetable cropping systems continuously needs to be improved in terms of its sustainability, effectiveness, and innovativeness. This Special Issue will focus on “Perspectives on the Use of Compost and Microorganisms to Control Pathogens of Vegetable Crops”. Novel research articles and reviews are sought covering any topics related to the sustainable control of pathogens on vegetable crops by using compost and microorganisms also with digital support, including (but not limited to) compost suppressiveness, biological control, innovative formulations, soil suppressiveness, quality and microbiology, plant–microbe–pathogen interaction, and suppressiveness-related biodiversity. The integration of suppressive composts and antagonistic microorganisms with digital technologies to enhance disease management of vegetables are also welcome.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
