

## Special Issue

# Big Data Analytics and Machine Learning for Smart Agriculture

### Message from the Guest Editors

At a time when digital technologies are organizing our lives increasingly boldly, and their benefits have not escaped any area of our lives including agriculture. Data collection, processing and analysis are an indispensable part of modern management. In a world of ubiquitous sensors, recorders and devices transmitting millions of bits per second, it is difficult to find the right path, generalize and draw conclusions. All this prompts us to reach for modern IT tools, which not only allow us to systematize the acquired information but also to draw conclusions that result in the acquisition of new scientific knowledge. The works presented in the Special Issue should be characterized by their applicability, but should also have a scientific aspect. Scientific articles should answer the question "how?" something is done, but also "why?" it happens. I encourage everyone to present the results of their research in this Special Issue. The prerequisite for accepting a paper is an original idea and a take on the problem.

### Guest Editors

Prof. Dr. Maciej Zaborowicz

Department of Biosystems Engineering, Poznan University of Life Sciences, Wojska Polskiego 50, 60-627 Poznań, Poland

Dr. Jakub Frankowski

Department of Bioeconomy, Institute of Natural Fibres and Medicinal Plants—National Research Institute, Wojska Polskiego 71B, 60-630 Poznań, Poland

### Deadline for manuscript submissions

closed (15 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
