Special Issue

Agricultural Citizen Science and Sustainable Regional Development

Message from the Guest Editors

The concept of citizen science is still less used in the development of sustainable agricultural practices, although its potential is great as a way to motivate rural communities to get involved in projects focused on identifying ways to capitalize on their strengths and meet challenges. This Special Issue aims to offer new perspectives on the importance of the wider use of citizen science in agriculture, with a particular focus on its impact on sustainable regional development. This Special Issue welcomes submissions on the following topics: the role of citizen science in addressing challenges in agriculture and food research; citizen science and the efficient use of resources and enhancing food safety; citizen science and the impacts of climate change on agriculture; and even emerging opportunities in relation to agricultural citizen science (role of technology; involving citizen scientists to support local decision making; involving citizen scientists in linking agriculture with other economic sectors, emergency management and rural extension). Original research articles and reviews are accepted.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. Agriculture is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
